| <input type="checkbox"/> State public health departments | <input type="checkbox"/> Policymakers |
| <input type="checkbox"/> Hospitals, clinics or managed care organizations | <input type="checkbox"/> Other: |

Background on the intervention:

All Stars™ is a school- or community-based program designed to delay and prevent high-risk behaviors in middle school-age adolescents (11 to 14 years old), including substance use, violence, and premature sexual activity, by fostering development of positive personal characteristics.

Findings from the systematic reviews:

The Substance Abuse and Mental Health Services Administration (SAMHSA) lists it as a model program while the Office of Educational Research and Information (OERI) cites it as promising program. See the Web site below for more information about All Stars.
